

Taking a B-tour: Site visits to B3Hub

It's hard hat and hi vis time!

The first peek at B3Hub was a milestone for our activity-based working project with about 20 staff visiting the new unit now under construction.

Internal fit-out of walls and services is progressing quickly, with the new active zone, quiet zone, kitchen, chat booths and Do Not Disturb rooms clearly visible.

With the transition program now more than halfway completed, storage sessions, IT training and more site visits will be completed by the end of the year, ready for the final move.

Staff said they like the bright open space (bigger than it looks), and the layout and flow.

The move-in date is yet to be confirmed, but early 2019 is currently the aim.

Thumbs up for active zone

Door to the future: builders will break through here to the therapies area for easy staff access

B3Hub Frequently Asked Questions

TOILETS: Toilets are located adjacent to the B3Hub, but outside the unit. Toilets are better located outside the office to give people a chance to stand up and stretch their legs on the way to the bathrooms, and to ensure no-one is disadvantaged by having to work close to the toilet block. Based on previous experience, work areas located close to toilet blocks are very seldom used.

COLOURS: Colours will be similar to the B2Hub. We will have more information about colour choices soon.

ARTWORK: All staff will be invited to consult about artwork choices closer to the time. Works will include a selection from our 2018 photo competition. You can see the full gallery on our website here: <http://www.bmdhproject.health.nsw.gov.au/Arts-and-Culture/2018-BMDH-Photo-Comp>

LOCKERS: There is space for 80 lockers. Closer to the time, we will work with you to determine if lockers will be allocated permanently, on a needs basis, or some combination that best suits your work practice.

BOOKABLE SPACES: Spaces will be a combination of bookable and non-bookable. We will confirm closer to the time which spaces will have online booking via Outlook calendars, and which ones will have physical panels.
