

Blacktown Hospital entry change from 14 March 2019

The next part of our main entry change will start on Thursday 14 March 2019.

Pedestrian access will be via a secure tunnel through the new atrium area.

This is to allow us to construct the new airlock and complete other works.

This change will last until early April.

Just follow directions from site staff and follow the signs to main entry, Reception and Emergency.

Please take extra care when driving or walking around the hospital.

There is no change to parking access and no change to Emergency entry near WSU.

Thanks for your patience.
