

Project scoops health awards

Western Sydney Local Health District's carer zones and expansion project have won three top health awards, recognising their contribution to patient partnerships and collaborative leadership.

The hospital's unique carer zones took home the prestigious peer-voted People's Choice Award and the Patients as Partners Award for the introduction of overnight bedside accommodation for carers of adult patients.

Local health leader Peter Rophail won the NSW Health Collaborative Leader of the Year Award, the State's top individual leadership honour, for his outstanding contribution to the expansion project.

Congratulations to our partners Health Infrastructure, WSLHD teams, BMDH Project team, Blacktown Hospital and Mount Druitt Hospital executive and staff, and our patients, carers and consumers and community. This win is for you!
